

# **Year 1 Maths Thursday 9/7/2020**

# Lesson Aims

To solve subtraction number sentences and use the answers to colour a picture.

# Starter

- Can you sort the numbers into **odds** and **evens**?
- **How** do you know if a number is odd or even?  
(*Hint: think about the ones/units*)

14	17	5	18	12
11	10	20	13	6

## Activity:

- Today you are going to solve subtraction number sentences on a snake picture and then find the answers on the activity sheet.
- Look what colour you need to use for the answer and colour that part of the snake carefully using that colour.
- (Do one together first to model how to do it.)
- You can mark it together at the end.

# Finally:

Bob thinks that if he subtracts **3** from **13**  
he will end up with **10**.  
Do you agree? Prove it!
