

Year 1

Maths

Friday 17/7/2020

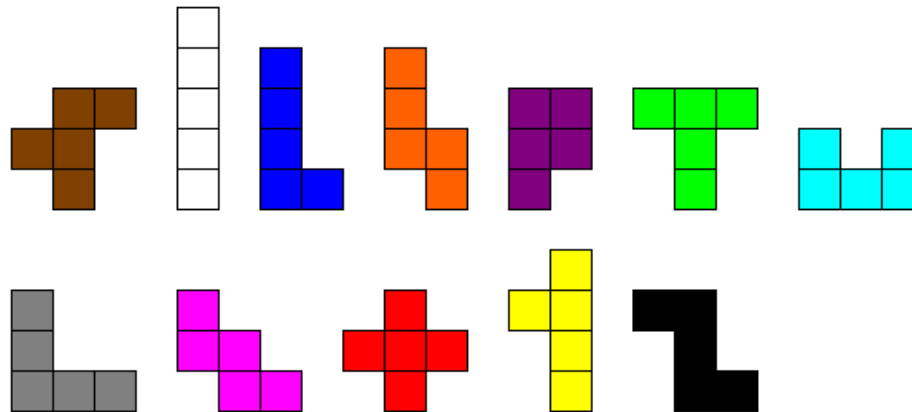

Lesson Aims

To know what pentominoes are and use them to complete a challenge.

What is a pentomino?

- A pentomino is made up of 5 equal squares joined together along a side (not corners)

Activity: To make an animal using the different pentominoes.

- Use the pentominoes to make different animal shapes. There are some examples on the activity sheet.
- Can you try to use all of the different pentominoes in your animal shape?
- If you have glue and paper, you can stick your animal creations down!
