LO: I can solve problems involving measures.
SC: I can read the question carefully. I can use a number line to help me.
I can find the difference/how much more by counting on.

1. Geoff pours 25 ml of juice into a jug. How much more does he need to pour in to make 80 ml ?
2. Jane needs 90 g of butter to bake a cake. If she has 58 g already, how much more does she need?
3. Santa needs 120 cm of tinsel to decorate his tree. He has a piece which measures 76 cm . How much more does he need?
4. Clare has 67 g of sweets in her bag. She can have up to 115 g . How much more could she put in?
5. Frank wants to go on a roller coaster ride. You have to be 137 cm tall to go on the ride. He is 84 cm tall. How much taller would he need to be?

A
