

**LO: I can use the expanded/contacted method of addition.**

**SC:** I can partition numbers into hundreds, tens and units.

I can add use root facts to help me add bigger numbers.

I can set my work out correctly.

I can start by adding the units.

I can regroup or exchange to make new tens or hundreds.

$$367 + 225 =$$

$$315 + 267 =$$

You now need to regroup the tens as well

$$567 + 278 =$$

$$466 + 268 =$$

$$548 + 284 =$$

$$380 + 257 =$$
