

LO: To understand that light is needed to see things

To understand that darkness is the absence of light

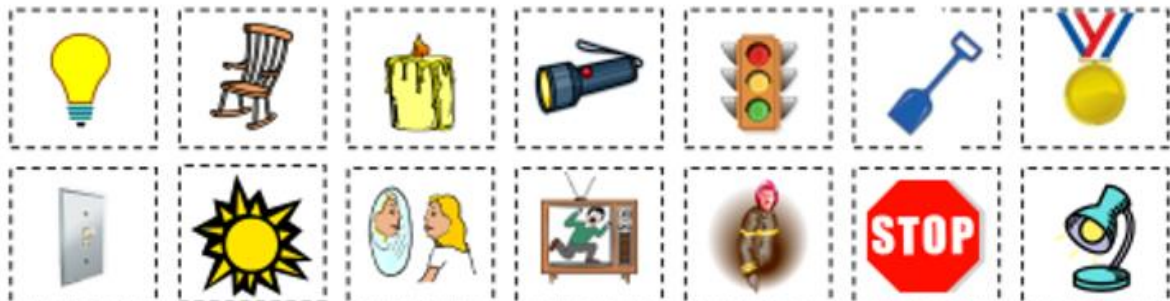

To understand that light is reflected from surfaces

SC: I can sort pictures understanding which are light sources and which are reflecting light

Sort the pictures below into light sources and objects we can see because of reflected light

Light sources	Objects that reflect light

Sort the pictures below into *light sources* and *things that reflect light*.

LO: To understand that light is needed to see things

To understand that darkness is the absence of light

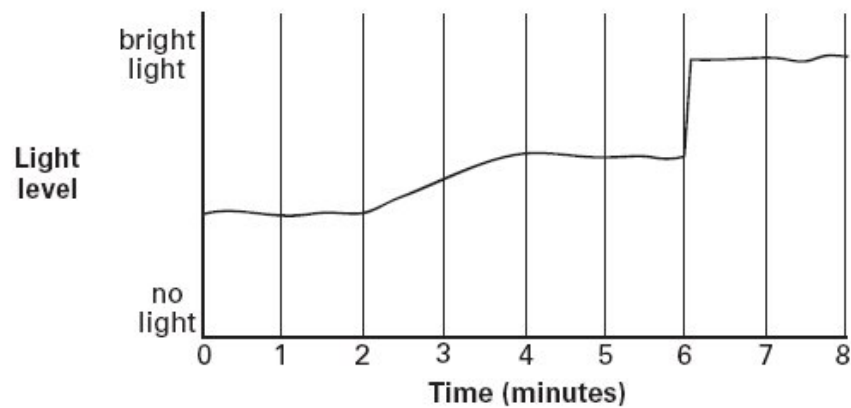

To understand that light is reflected from surfaces

SC: I can sort pictures understanding which are light sources and which are reflecting light

Challenge:

- (b) Some children place a light sensor in the middle of the classroom.

The graph below shows how the light level changed over time.

Describe what happened to the light level between two and four minutes on the graph.

.....

- (c) Describe **ONE** thing that could have happened in the classroom at six minutes to make the light level suddenly change.
