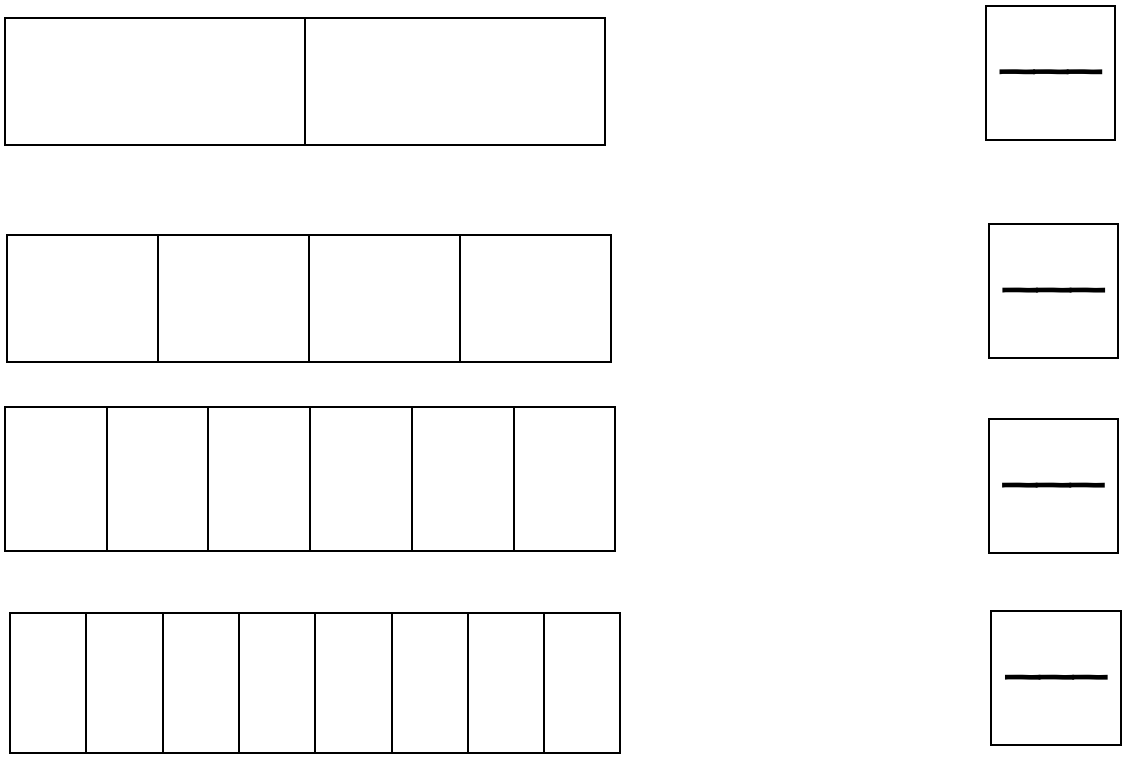
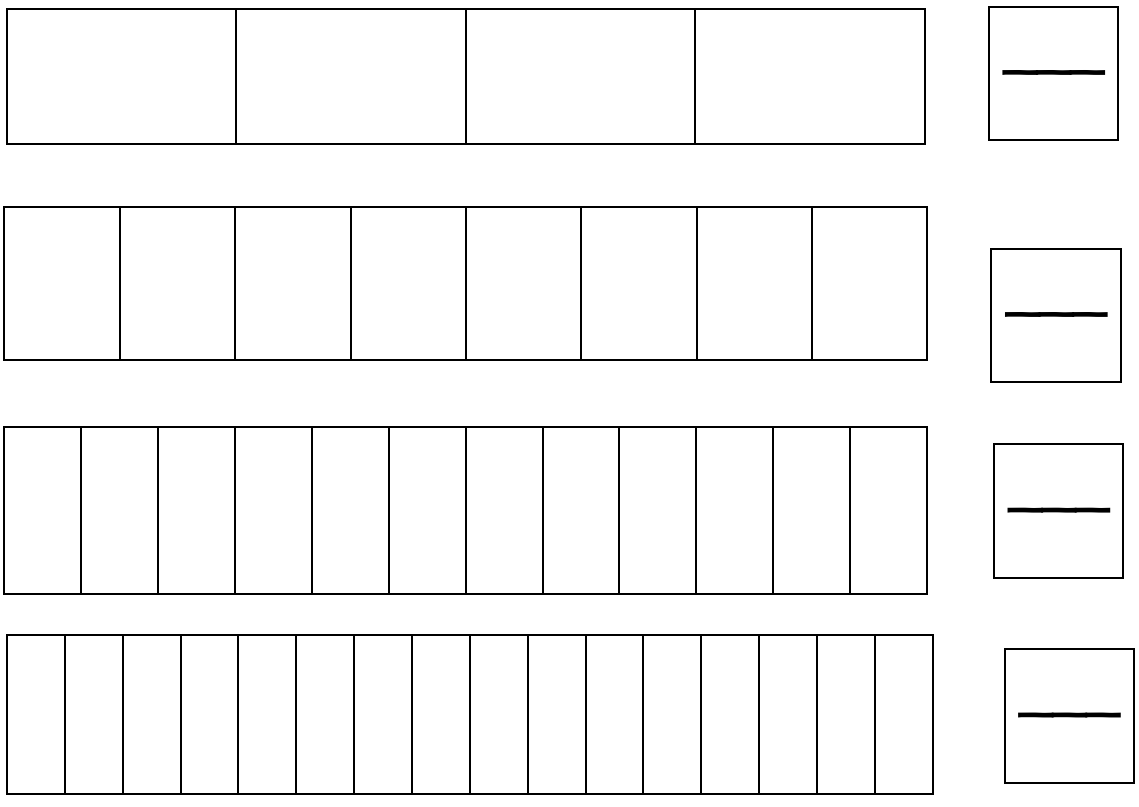
LO: I can match equivalent fractions.

SC: I know that fractions with different numerators and denominators can share the same value.
I can recognise equivalent fractions using diagrams.

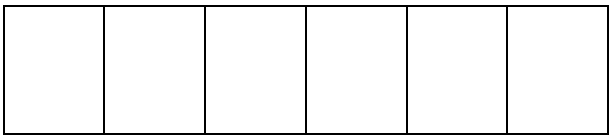
Shade $\frac{1}{2}$ of all these shapes and write the equivalent fractions next to them:

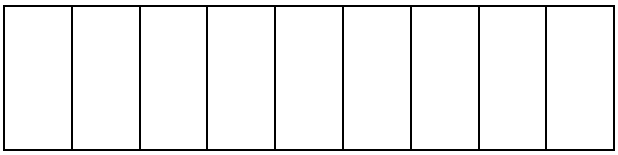


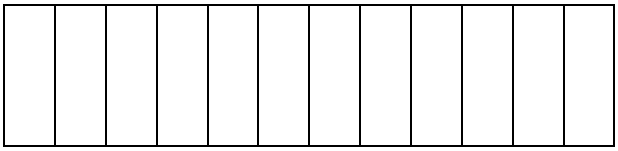
Shade $\frac{1}{4}$ of all these shapes and write the equivalent fractions next to them:



Shade $\frac{1}{3}$ of all these shapes and write the equivalent fractions next to them:







Shade $\frac{1}{5}$ of all these shapes and write the equivalent fractions next to them:
