

### **3, 4 and 8 snake x table race**

The snake has the answers to the times tables on it, but what are the questions?

Throw the die and move the number of places shown. On the space is a number, you need to work out the question. For example, if the square shows 32, the answer would be  $4 \times 8$ .

If you get the question incorrect, you miss a turn.

The winner is the first person to get to the finish.
