

Year 3 Science w/c 20.07.20

Science – Lesson 7 – Create a piece of Shadow Art

LEARNING INTENTION:

- To create a piece of art using shadows of objects.

Shadow art

Now is your time to get creative with shadows!

- Look around you for interesting shaped objects, toys or plants that will make a good shadow when put in front of a light source (the sun or a torch). Maybe you could make something out of Lego.
- Start creating a picture by tracing the shadows that your objects make on a piece of paper.
- Add different colours, more shadow outlines or maybe layers of shadows to develop your picture into an effective design.
- Look at the following slides to give you some ideas and inspiration for your artwork.
