

# Starter

9 out of the 10 fruits and  
vegetables we eat come  
from abroad.

What is the problem with  
this?

# Play Your Cards Right?

On your table you have the ingredients to make a pizza.

Sort the ingredient cards into which has travelled the furthest to Britain.  
The furthest food should be on the left.

# Tuna

5,600 miles

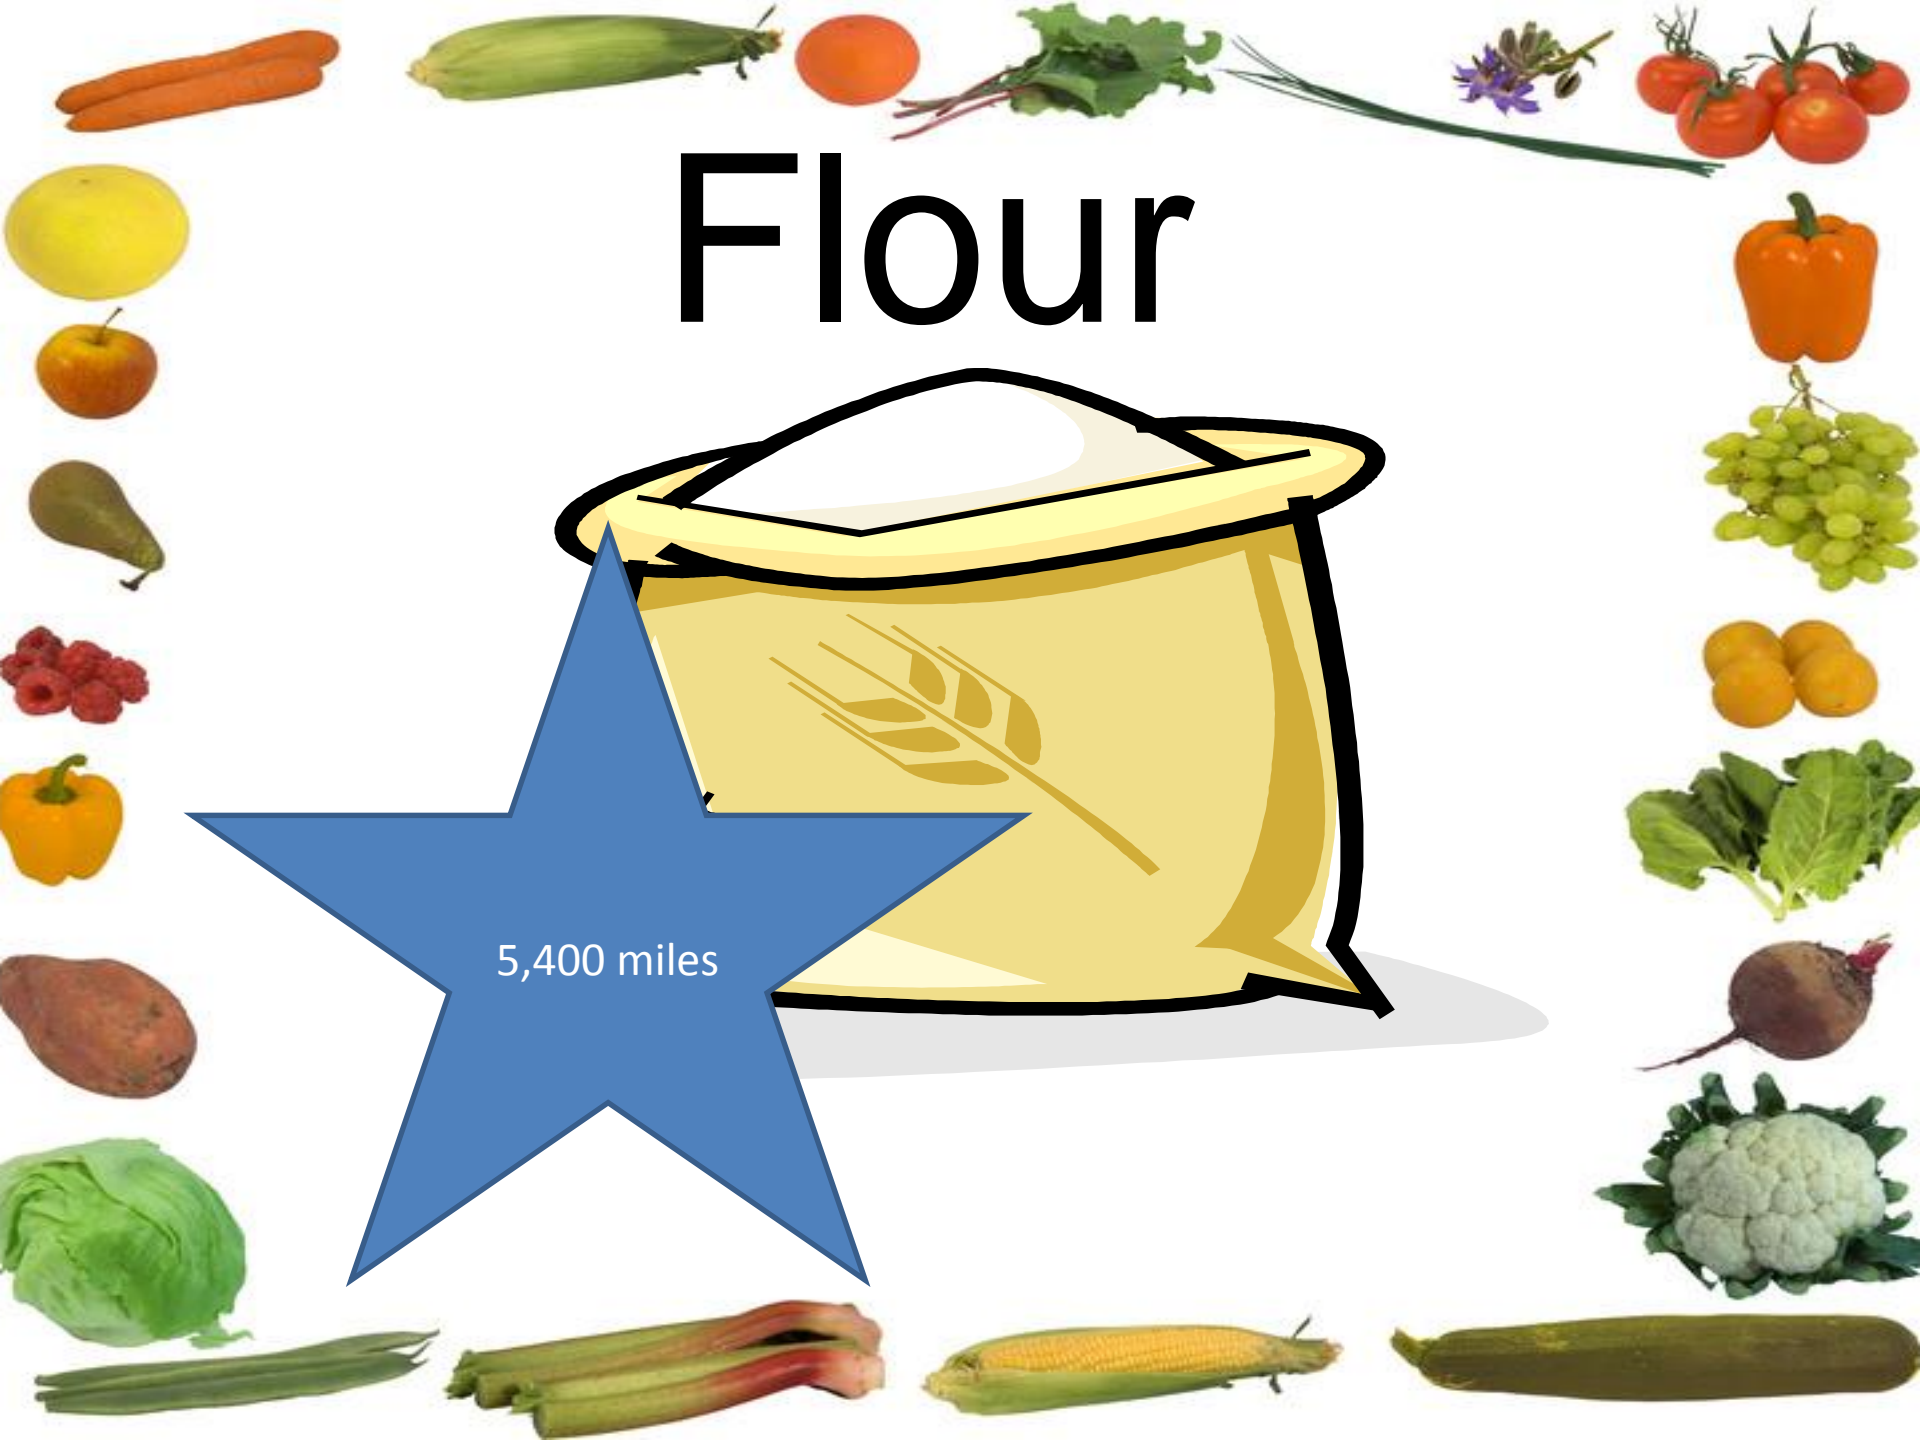

# Flour

5,400 miles

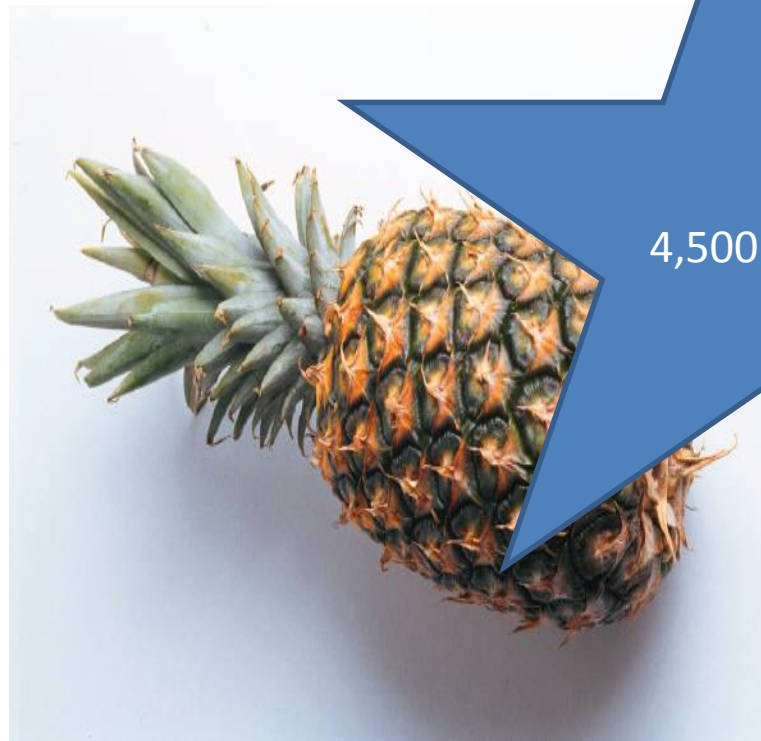

# Black Pepper

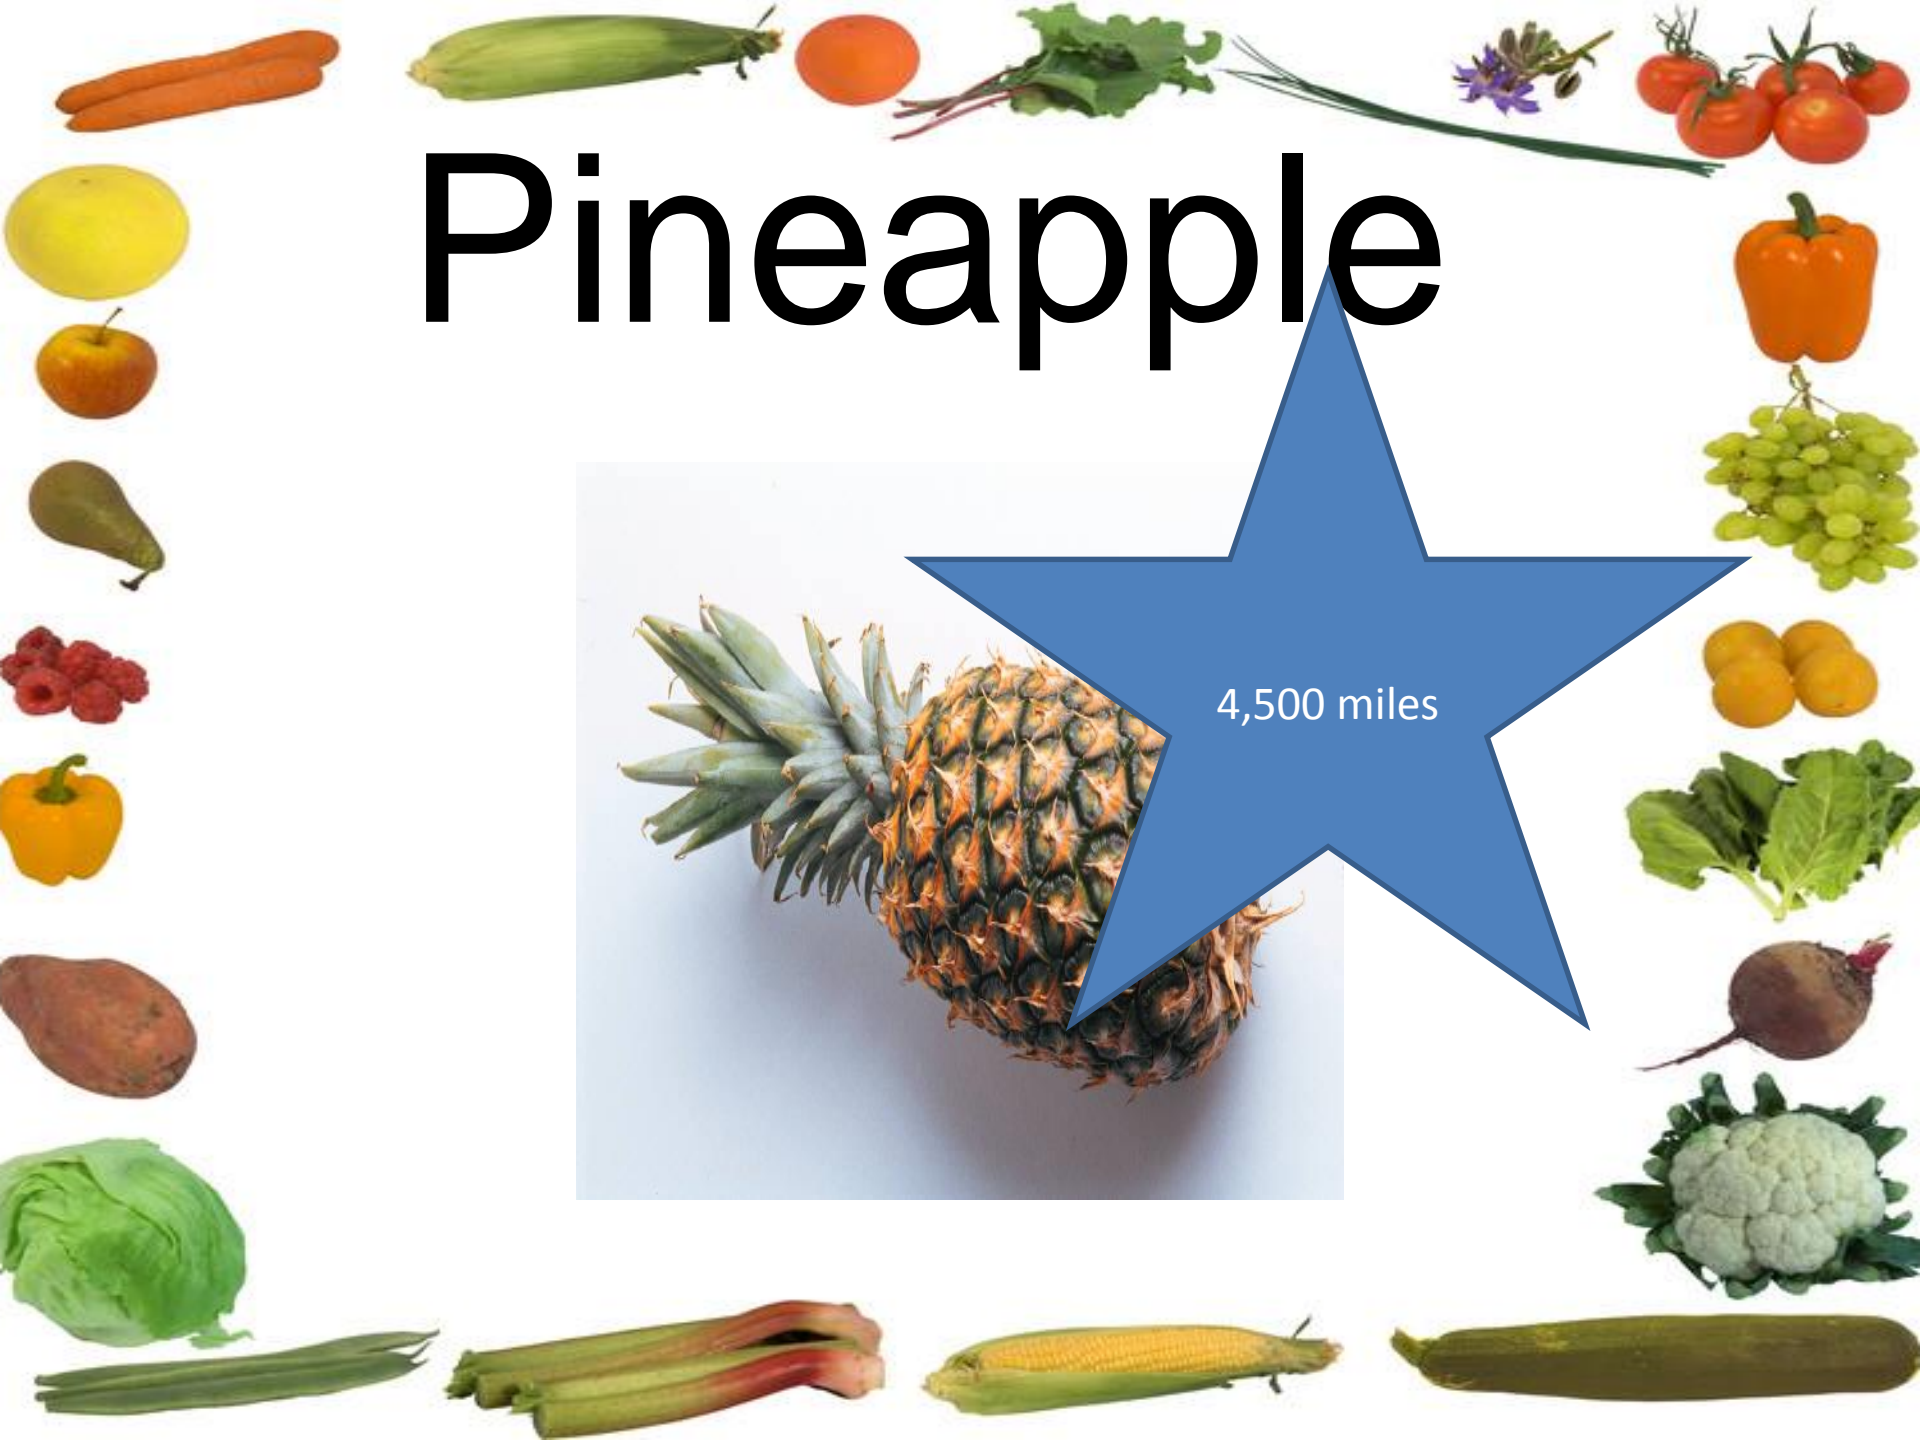

5,000 miles

# Pineapple

4,500 miles

# Mozzarella

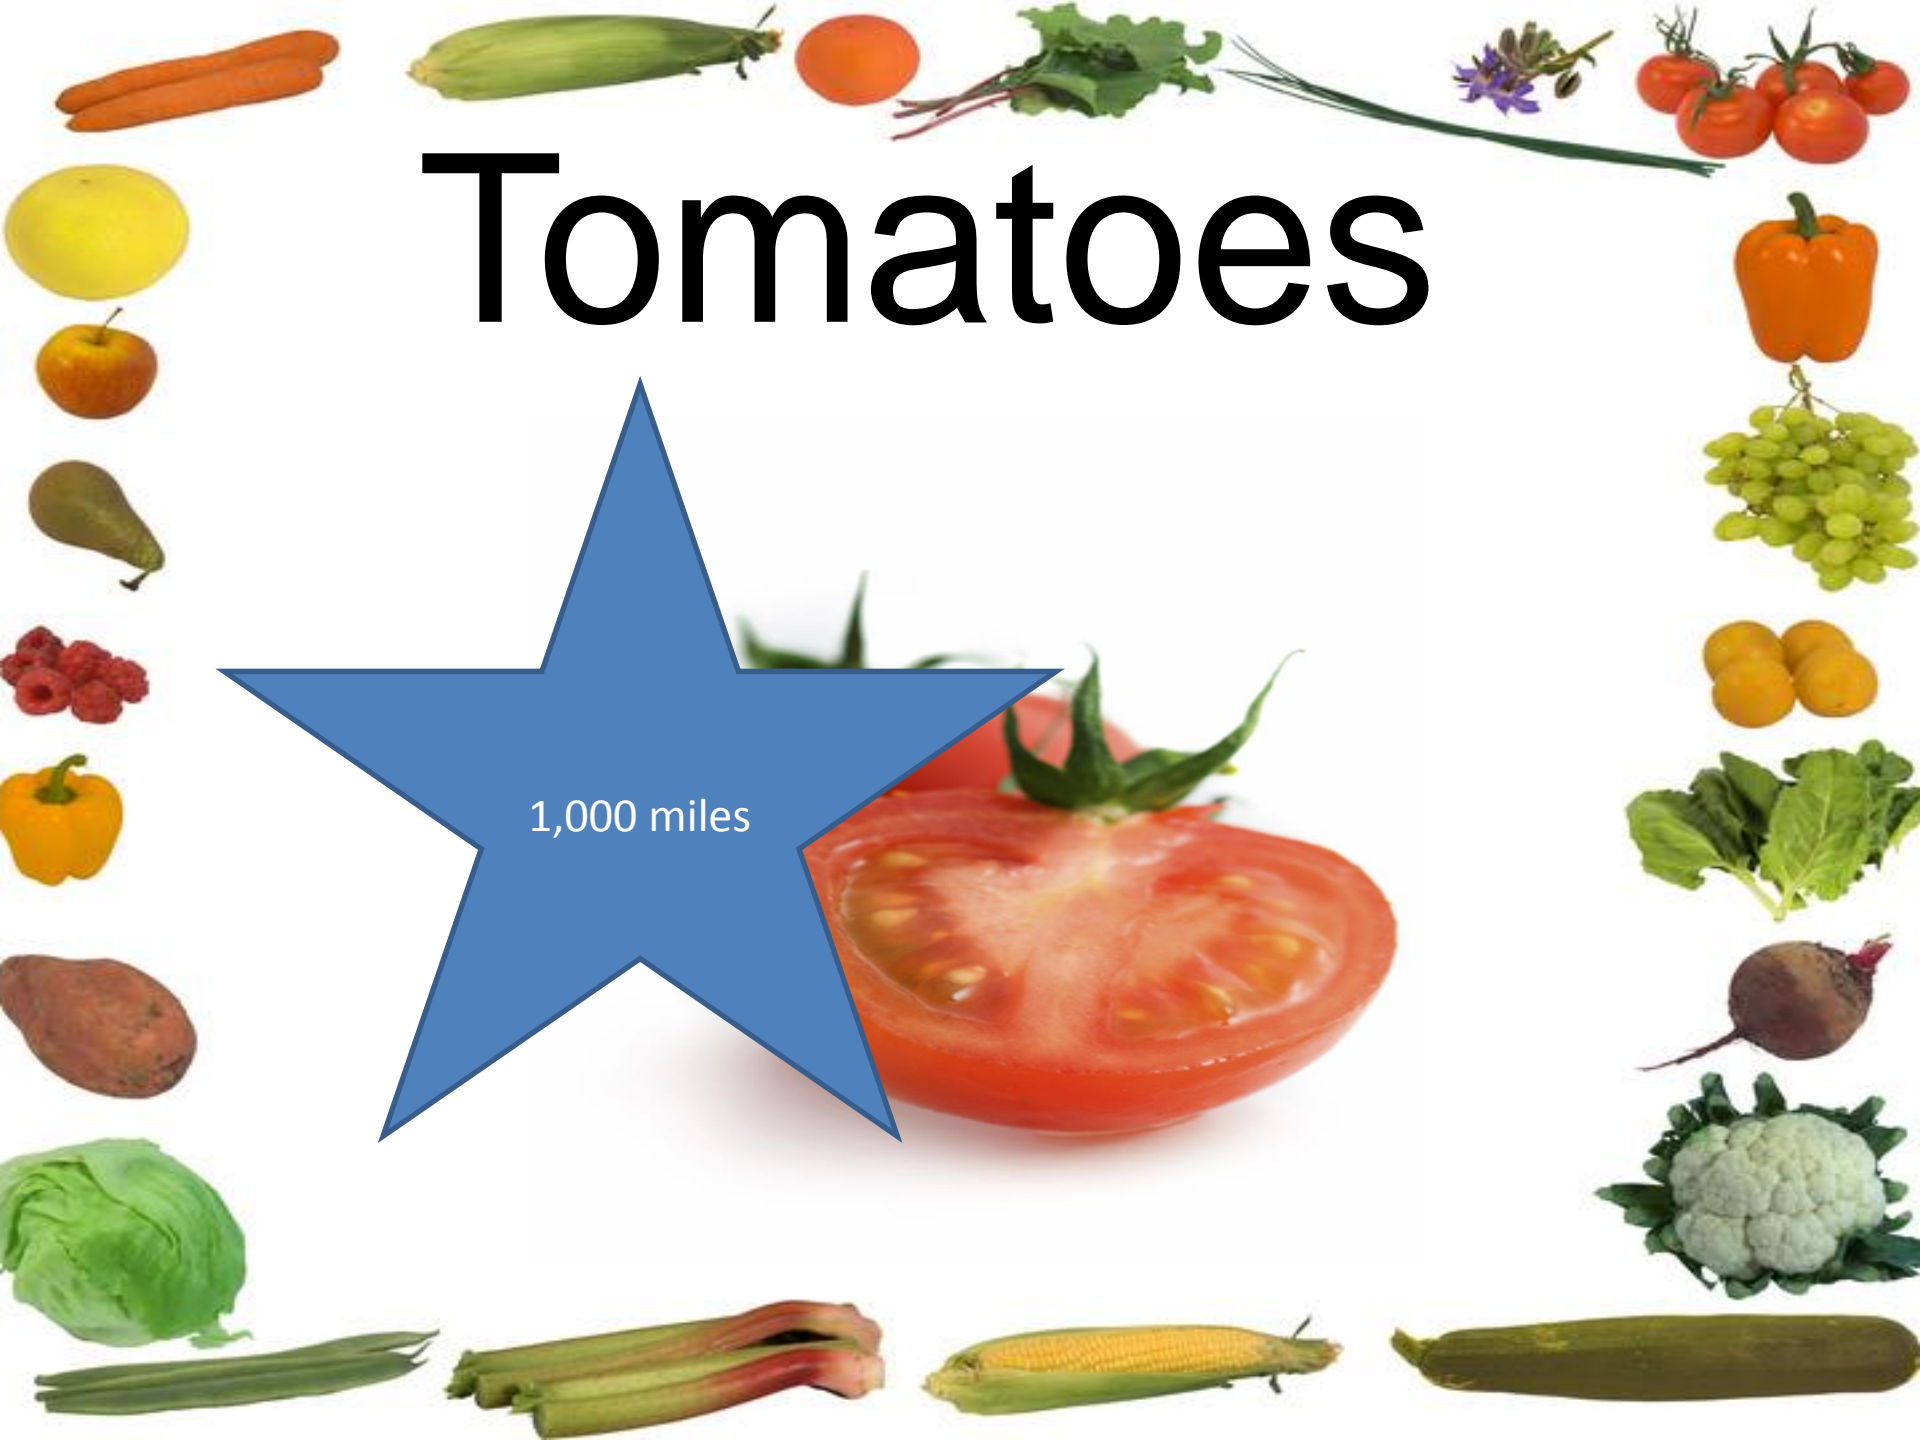

1,000 miles

# Tomatoes

1,000 miles

# Peppers

A collage of various vegetables and fruits arranged around a central blue five-pointed star. The items include carrots, corn, tomatoes, leafy greens, chives, purple flowers, cherry tomatoes, a yellow bell pepper, a bunch of green grapes, oranges, a bunch of green leafy vegetables, a beet, a head of cauliflower, a cucumber, corn, asparagus, green beans, a head of lettuce, a potato, a yellow bell pepper, raspberries, a pear, an apple, and a lemon. The central blue star contains the text "400 miles".

400 miles

# Mushrooms

200 miles

# Total distance travelled

An  
incredible.....  
23,100 miles

A variety of fresh produce is arranged in a border around the central text. At the top, there are two carrots, a corn cob, a tomato, some leafy greens, a purple flower, and a bunch of cherry tomatoes. On the left side, from top to bottom, are a yellow lemon, a red apple, a pear, a bunch of raspberries, a yellow bell pepper, a sweet potato, and a head of lettuce. On the right side, from top to bottom, are an orange bell pepper, a bunch of green grapes, three oranges, a bunch of leafy greens, a beet, and a head of cauliflower. At the bottom, there are two stalks of asparagus, a corn cob, and a cucumber.

Place the fruit and  
vegetables on the  
map – which country  
are they from?

# **Split your A3 paper in half list**

On one half, list the benefits of  
having foods transported from  
around the world.

On the other half, list the  
disadvantages.
