

### **Thursday lessons**

Nearly the end of the week!

What you are going to up to today.

**MATHS** – We are using all the work we have done this week on multiplication and division to help us solve word problems. You will need to read the problem carefully and work out whether the questions is asking you divide or multiply. Write the number sentence and then solve the question. Use an array to help you if you need to.

**ENGLISH** – We have written some fantastic stories in school and I am sure that yours at home are equally as good. Today you are going to evaluate your story. This means that you are going to read through everything that you have written and tick off, using the worksheet, against your success criteria. Have fun reading your story to an adult, if you can, and use lots of expression. Did you manage to include everything? Was there anything that you left out? Once you have done that think carefully about what you are really proud of, what did you do well? Then think about something that you would like to improve upon for next time you write. It could be adding more conjunctions, making your handwriting neater, remembering punctuation. Anything that you picked up from reading your work.

**FRENCH** – This week we are learning the colours. Work through the power point and then get an adult to choose some different things that you have in your house and ask you what colour they are. Can you say c'est \_\_\_\_\_  
Complete the worksheet attached.

### **READING – 30 MINS**

You can read to yourself today. Once you have finished can you explain what you have been reading about to an adult. Can you find any vocabulary that you were unsure of and use a dictionary to find the meaning.
