$\qquad$
This week I am practising the $\qquad$ times tables

Shade in the multiples of $\qquad$ on the number square

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 |
| 21 | 22 | 23 | 24 | 25 | 26 | 27 | 28 | 29 | 30 |
| 31 | 32 | 33 | 34 | 35 | 36 | 37 | 38 | 39 | 40 |
| 41 | 42 | 43 | 44 | 45 | 46 | 47 | 48 | 49 | 50 |
| 51 | 52 | 53 | 54 | 55 | 56 | 57 | 58 | 59 | 60 |
| 61 | 62 | 63 | 64 | 65 | 66 | 67 | 68 | 69 | 70 |
| 71 | 72 | 73 | 74 | 75 | 76 | 77 | 78 | 79 | 80 |
| 81 | 82 | 83 | 84 | 85 | 86 | 87 | 88 | 89 | 90 |
| 91 | 92 | 93 | 94 | 95 | 96 | 97 | 98 | 99 | 100 |

## Here are the multiplication facts:

| $0 \times$ | $=$ | $\times 0=$ |
| :---: | ---: | :--- |
| $1 \times$ | $=$ | $\times 1=$ |
| $2 \times$ | $=$ | $\times 2=$ |
| $3 \times$ | $=$ | $\times 3=$ |
| $4 \times=$ | $\times 4=$ |  |
| $5 \times$ | $=$ | $\times 5=$ |
| $6 \times$ | $=$ | $\times 6=$ |
| $7 \times$ | $=$ | $\times 7=$ |
| $8 \times$ | $=$ | $\times 8=$ |
| $9 \times$ |  | $\times 9=$ |
| $10 \times$ | $=$ | $\times 10=$ |
| $11 \times$ | $=$ | $\times 11=$ |
| $12 \times$ | $=$ | $\times 12=$ |

Here are the division facts:

| $\div$ | $=0$ |
| ---: | :--- |
| $\div$ | $=1$ |
| $\div$ | $=2$ |
| $\div$ | $=3$ |
| $\div$ | $=4$ |
| $\div$ | $=5$ |
| $\div$ | $=6$ |
| $\div$ | $=7$ |
| $\div$ | $=8$ |
| $\div$ | $=9$ |
| $\div$ | $=10$ |
| $\div$ | $=11$ |
| $\div$ | $=12$ |
