

## **Tuesday lessons**

Welcome to Tuesday's learning.

**ENGLISH** – Today, in school, we have yet another assessment paper. This time it is in reading. We will make sure that you get a copy of this for you to complete at home – Laurence we will put it in your brother's book bag at the end of the day tomorrow.

While we are doing that, we thought you could have a go at this whole class guided reading that we will be doing in the afternoon.

**MATHS** – We are continuing with fractions today. Yesterday, we worked out how to find a fraction of a set of objects and number. Today we are going to look at non – unit fractions. This means when the numerator is more than 1. Take a look at the power point and then work through the sheet. You might find these videos useful to explain how to work out non – unit fractions of a set of objects and a number. <https://www.bbc.co.uk/bitesize/articles/z78g47h>

**SCIENCE** – Today we are finishing are science topic and we will be learning about the role of our muscles in helping our skeleton to move. There is a short video to watch and I have also included a sheet where you can make your own arm using cardboard and elastic bands if you feel like it. Once you have done that you can complete the sheet if you feel up to it.

### **READING/HANDWRITING – 20 MINS**

As you have done a reading activity already today perhaps you could have a go at practising your handwriting instead. Use some lined paper and have a go at practising those letters that have descenders that go below the line – y,g,f,p,q,j.

Write them singularly and then within short words.
