

Year 6
Maths
Friday 5th June

Lesson Aims

- I can solve missing box calculations on addition and subtraction.

Fluency Starter

Look back at the powerpoint on addition and subtraction from Wednesday. Remind yourself of the column method for addition and subtraction.

Main Teaching

In the lesson today you need to complete missing box calculations on addition and subtraction.

Remember the importance of INVERSE to help you.

You will need to look carefully at the calculations.

Always check your answer by solving the calculation after completing the missing boxes. This will help you know if you are correct.

There are lots of questions on each sheet. You do not need to do all of them. Choose to do about 15-20 from the addition sheet and the same from the subtraction sheet.

Fluency

The files you need are on the website under this powerpoint.

Review

What have you learnt today?

Can you find missing box calculations?
