

Year 6 Leavers - Video Project

It would be great if Home Learners could join in with the video project we are doing in school. The format is similar to the video done by the staff before half term. There is also an example on the website of one done by Year 6 a few years ago.

The main idea is that each person/group videos just their part and then it will be put together with a backing track. Step by step, all you need to do is:

1. Check the e-mail sent where you will find the lines.
2. Decide how you are going to 'perform' your line(s) – feel free to perform your bit any way you want to – try to 'illustrate' the words.
3. You just need to lip-sync as there will be no sound from your videos included.
4. Use the music attached to the email (this is the version we will all be using) in the background to help you to 'perform' your line(s) so that the timing is right.
5. If possible, perform your line outside as the light is better. Make sure there is nothing in the frame that could identify your house or where you live.
6. Please 'perform' the line before and after your line(s) so that it is easier to splice them all together. Try to position the phone (video device) so that you fill the screen. If you are doing more than one line, please do this as two separate videos.
8. Video your performance in landscape format on your phone.
9. Email your video to the office.
