LO: To know what each of the digits in 2-digit numbers represents.

- I can write the 2-digit numbers that are being shown with the dienes
- I can use dienes to make 2 digit numbers

Now choose different 2-digit numbers. Write them on the top of each column.
Then draw the dienes to go with them underneath. Remember, you can just draw a Vertical line for the ten rods and smaller squares for each unit/one.
e.g, 24
