

Find 5 toys.

**Put them in
height order.**

**Go on a 3D
shape hunt.**

**What shapes
can you find?**

Roll a dice.

**Show the
number in
different ways.**

Encourage children to use language to compare the height, e.g. *taller than, shorter than*. Toys can be ordered from shortest to tallest or tallest to shortest.

Discuss 3D shapes. Encourage children to name the shapes they have found. *Sphere, cube, cuboid, cone, cylinder*. Can they sort the shapes?

Children to roll a dice to generate a number. Encourage children to find different objects around the house to represent the number, e.g. 4 spoons, 4 shoes, 4 buttons.

123

Find pairs of items in your house.

Classroom secrets+

Encourage children to find different pairs of objects. Discuss what the word 'pair' means. Children to count the pairs in 2s to find the total.

Children to explore the house and record the different numbers they can see. Encourage the children to compare, order or sort the different numbers.
