Lesson Aims

To add two 2- digit numbers using exchanging.

- I can add two 2-digit numbers.
- I can partition each number into 10s and units.
- I can add the units together.
- I can exchange the units if there are 10 or more units.
- I can add the tens together.
- I can draw the dienes to show my working out.

What words tell us what this symbol means?

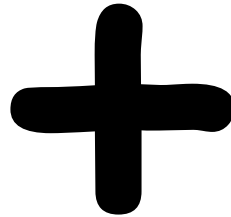

What words tell us what this symbol means?

add

altogether

total

addition

sum

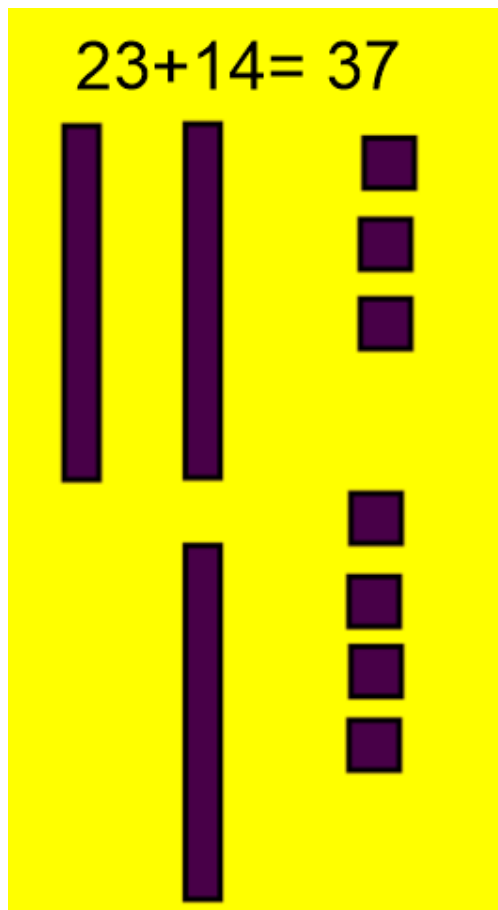

Main Teaching

Draw your dienes
out to show

$$23+14=$$

Main Teaching

Main Teaching

Draw your dienes

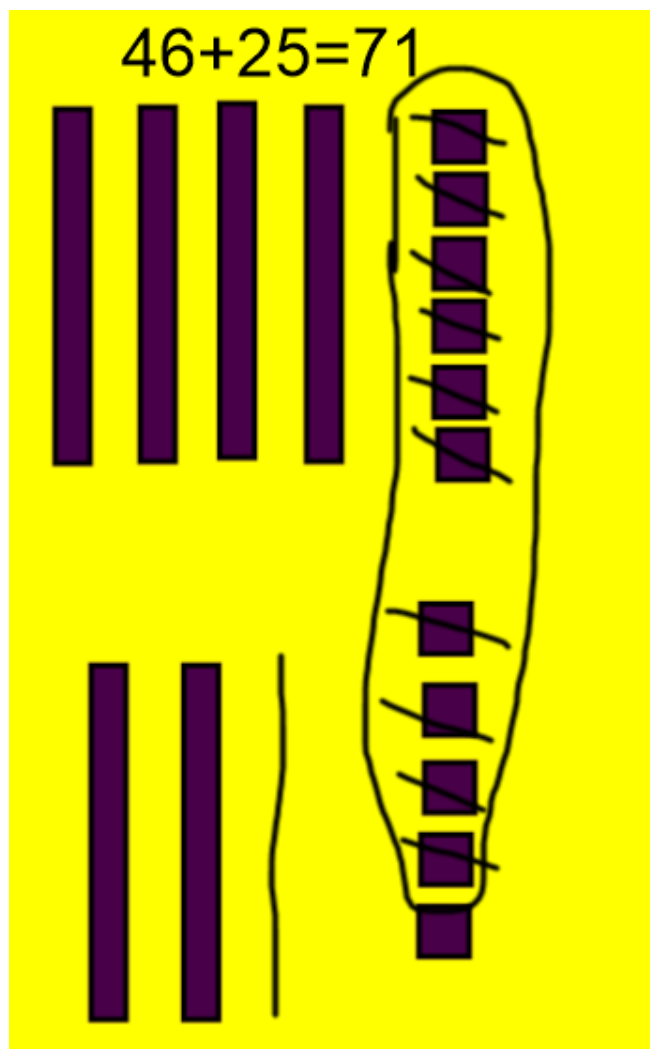

out to show

$$46+25=$$

Remember you will have to
exchange!

Main Teaching

Your task...

Have a go at these number sentences.
Remember to check the units to see if you need to exchange.

$$41+25=$$

$$36+18=$$

$$56+37=$$

$$49+25=$$

$$26+22=$$
