

LO: I can draw an array to help solve a multiplication number sentence.

SC: I can count in 3s, 4s and 5s.

I can draw groups of 2s, 3s, 4s and 5s until I get to the answer.

I can count how many groups I have drawn to find the missing number.

Draw arrays to help you work out the missing numbers in the X number sentences.

$$3 \times \square = 18$$

$$6 \times \square = 30$$

$$4 \times \square = 24$$

$$7 \times \square = 21$$

$$\square \times 4 = 28$$

$$\square \times 9 = 36$$

Challenge:

Here is an array of counters.

Use the array to complete the mathematical statements.

$$\square \times 6 =$$

$$6 \times \square =$$

Can you write the division sentences?
