

---

Usually Unicorns live in forests. Many of them are very shy so like to keep hidden. However, there are some that are braver and, if you are lucky, can be seen galloping across the fields when there is a full moon.

---

A few evil people kill unicorns and cut off their horns because they believe the horn will help them to fly.

---

A unicorn looks like a horse but it has a spiral horn that comes out of the front of its head.

They are amazingly rare and if you get to spot one you are very lucky.

---

If a unicorn's horn is dipped into poisonous water it will become pure. (True)

---

Many Unicorns can gallop faster than a cheetah.

---

Unicorns are magic. This magic is found in their horns and is what gives the Unicorn the power to fly.

---

All Unicorns have the body of a horse and a long horn which sticks out from the middle of its head. They have a sharp point and it is usually a spiral shape. Most unicorns are a pure white but some multi coloured ones have been spotted.

---

Most Unicorns eat grass but a few also eat apples or carrots when they can find them.
