LO: To use a number line to count back for subtraction

- I can use my number line to work out the missing number in a subtraction number sentence

Can you work out the missing numbers in the subtraction number sentences? When you have finished, remember to check back through your answers.

$$12 - \bigcirc = 3$$

$$19 - \bigcirc = 11$$

$$15 - \bigcirc = 4$$

$$17 - \bigcirc = 8$$

$$10 - \bigcirc = 2$$

$$14 - \bigcirc = 5$$

$$13 - \bigcirc = 7$$

$$20 - \bigcirc = 6$$

Now try these. Think carefully about what you need to do!

$$\bigcirc - 5 = 3$$

$$\bigcirc - 2 = 11$$

$$\bigcirc - 6 = 13$$

$$\bigcirc - 8 = 5$$
