Year 1
Maths
Wednesday 8/7/2020

Aim: To be able to subtract on a number line to help solve a problem.
I can count back on a number line.
I can say how many spaces/numbers I jumped back.

Example.

Halve each of the numbers below:

2   12

8   18

6   16

Today, you will be using your number lines to help you solve a problem.

Quick recap: How do you count back on the number line?

Can you think of 2 numbers that could be used to complete this number sentence? Use the number line to help you.

Write your idea down and explain to someone how you worked it out.

? - ? = 12

How many different ways are there to complete the number sentence?

Activity:

See activity sheet.

- (*Home learners: If you needed more practise with counting back yesterday, you can chose to do the missing number activity that was set for Tuesday instead*.)

Finally:

Bob thinks that if he subtracts **5** from **17** on the number line, he will land on **13**.

Do you agree? Prove it!
