Australia!

Australia is one of the most unique countries in the world!

It has many habitats, animals and plants and geographical features that you don't find anywhere else in the world!

We are going to learn lots about Australia and how it is different and similar to where we live.

What do you know about Australia?

Watch this video from the National Geographic for Kids to find out more about Australia!

<https://www.youtube.com/watch?v=f0PvMmTAUAQ>

Australia info!

Read through the 'All About Australia' slides to find out more information about Australia!

What different types of places and environments are there in Australia?

How is it similar or different from our country?

Lesson aim

I know where Australia is on a map of the world.

I know all 7 continents of the world.

I know all 5 oceans of the world.

Where is Australia on a map of the world?

What is a continent?

A **continent** is a large solid area of land.

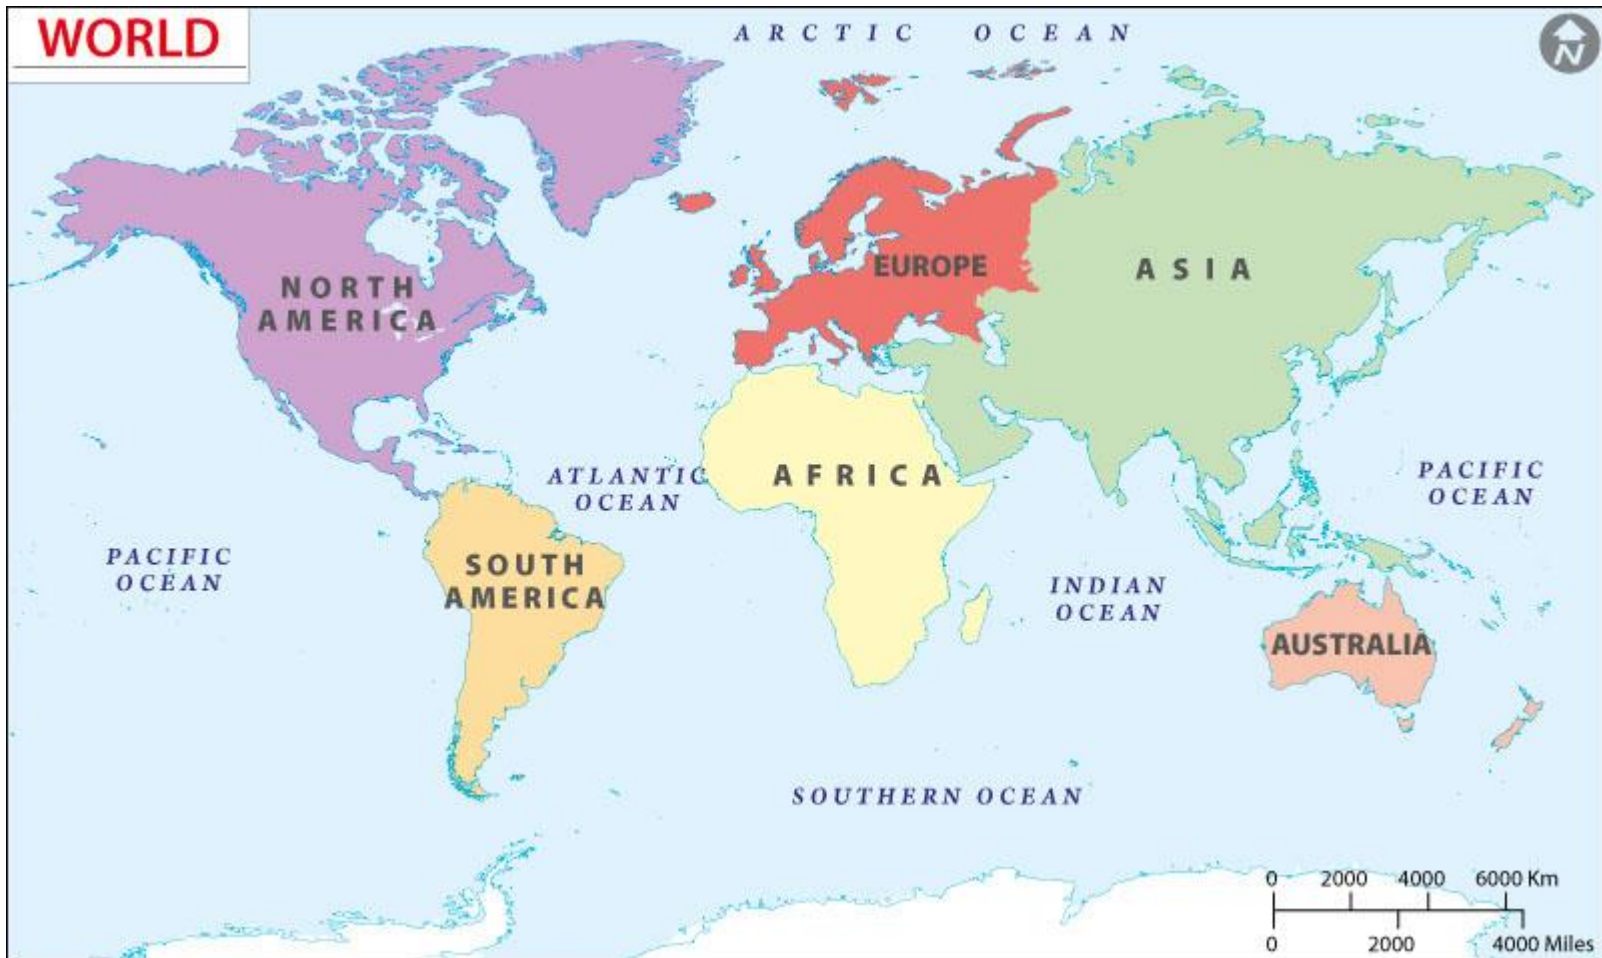

Earth has seven **continents**.

In order from largest to smallest, they are Asia, Africa, North America, South America, Antarctica, Europe, and Australia.

The 7 continents are separated by 5 main oceans.

Can you see all 7 continents and 5 oceans?

Your task

Using the map in the Monday folder, mark the 7 continents and 5 main oceans of the world.
